

SCENARIO OUTLINE(S)

Scenario: Login to account with a valid password

Given I access webdriveruniversity

When I click on the login portal button

And I enter a username

And I enter a "valid" password

When I click on the login button

Then I should be presented with a successful validation alert

Scenario: Login to account with a invalid password

Given I access webdriveruniversity

When I click on the login portal button

And I enter a username

And I enter a "invalid" password

When I click on the login button

Then I should be presented with a unsuccessful validation alert

SCENARIO OUTLINE(S)

Scenario Outline: Login to account with credentials

Given user navigates to "<url>"

When user clicks on the login portal button

And user enters the "<username>" username

And user enters the "<password>" password

When user clicks on the login button

Then the user should be presented with the following prompt alert "<message>"

Examples:

url	username	password	message
ttp://www.webdriveruniversity.com	user1	pass1	validation failed
ttp://www.webdriveruniversity.com	webdriver	webdriver123	validation succeeded

SCENARIO OUTLINE(S)

Scenario Outline: Login to account with credentials

Given user navigates to "<url>"

When user clicks on the login portal button

And user enters the "<username>" username

And user enters the "<password>" password

When user clicks on the login button

Then the user should be presented with the following prompt alert

"<message> "

Examples:

url	username	password	message
http://www.webdriveruniversity.com	user1	pass1	validation failed
http://www.webdriveruniversity.com	webdriver	webdriver123	validation succeeded

SCENARIO OUTLINE(S)

Scenario Outline: Login to account with credentials

Given user navigates to "<url>"

When user clicks on the login portal button

And user enters the "<username>" username

And user enters the "<password>" password

When user clicks on the login button

Then the user should be presented with the following prompt alert

"<message> "

Examples:

url	username	password	message
ttp://www.webdriveruniversity.com	user1	pass1	validation failed
ttp://www.webdriveruniversity.com	webdriver	webdriver123	validation succeeded

SCENARIO OUTLINE(S)

Scenario Outline: Login to account with credentials

Given user navigates to "<url>"

When user clicks on the login portal button

And user enters the "<username>" username

And user enters the "<password>" password

When user clicks on the login button

Then the user should be presented with the following prompt alert

"<message> "

Examples:

url	username	password	message
ttp://www.webdriveruniversity.com	user1	pass1	validation failed
ttp://www.webdriveruniversity.com	webdriver	webdriver123	validation succeeded

SCENARIO OUTLINE(S)

Scenario Outline: Login to account with credentials
